

## Product specification

Product	Mouse-anti-Camelidea IgG1 (H+L) Antibody (Biotin)
Reactivity	Old World and New World Camelids
Clone	NEM27.7
Host	mouse
Clonality	monoclonal
Conjugate	Biotin-conjugated
Subclass	IgG1
Size	250 µL
Antibody concentration	1mg/ml
Application	ELISA
Buffer	PBS (pH 7.4), 0,02% sodium azid
Antibody specificity	Based on ELISA the antibody reacts with whole molecule camelid IgG1. It does not react with the Ig of rat, mouse, human, sheep, goat, chicken, bovine and horse.
Purity	The antibody was purified from culture supernatant by affinity chromatography using Protein A coupled to sepharose. Purity >95% as determined by SDS gel electrophoresis.

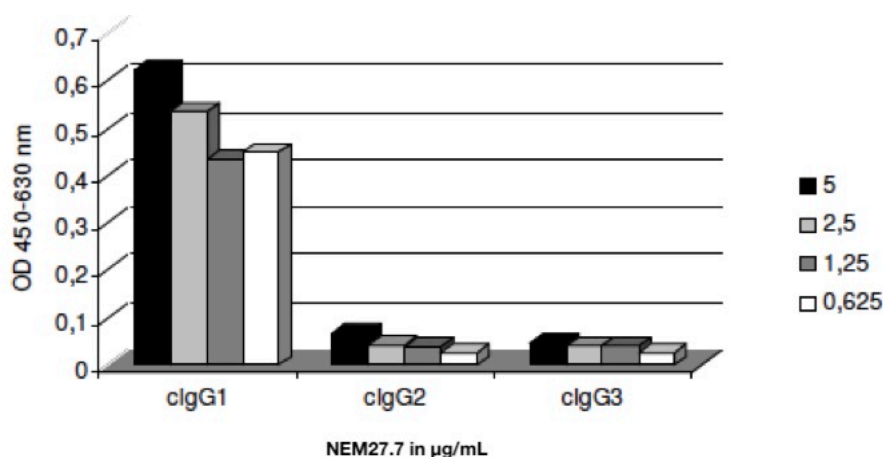

Fig.: ELISA Plates were coated with the different subclasses of camelid IgG and detected with NEM27.7. Camelid IgG1 was detected.
